THE REPLY FILED 06 May 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.						
PERIOD FOR REPLY [check either a) or b)]						
a) The period for reply expires <u>3</u> months from the mailing date of the final rejection.						
b) The period for reply expires on: (1) the mailing date of this no event, however, will the statutory period for reply expire ONLY CHECK THIS BOX WHEN THE FIRST REPLY WA 706.07(f). Extensions of time may be obtained under 37 CFR 1.136(a). The fee have been filed is the date for purposes of determining the period fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of (2) as set forth in (b) above, if checked. Any reply received by the Oftimely filed, may reduce any earned patent term adjustment. See 37	e later than SIX MONTHS from the mailing STILED WITHIN TWO MONTHS OF THE date on which the petition under 37 CF of extension and the corresponding amount of the shortened statutory period for reply fice later than three months after the mai	g date of the final rejection. HE FINAL REJECTION. See MPEP R 1.136(a) and the appropriate extension out of the fee. The appropriate extension originally set in the final Office action; or				
1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.						
2. \boxtimes The proposed amendment(s) will not be entered to	pecause:					
(a) They raise new issues that would require further consideration and/or search (see NOTE below);						
(b) ☐ they raise the issue of new matter (see Note below);						
(c) ⊠ they are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or						
(d) they present additional claims without cance NOTE:	ling a corresponding number of fi	inally rejected claims.				
3. Applicant's reply has overcome the following rejection	ction(s):					
 Newly proposed or amended claim(s) would canceling the non-allowable claim(s). 	d be allowable if submitted in a se	eparate, timely filed amendment				
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for application in condition for allowance because:		dered but does NOT place the				
6. The affidavit or exhibit will NOT be considered be raised by the Examiner in the final rejection.	cause it is not directed SOLELY t	o issues which were newly				
7. For purposes of Appeal, the proposed amendmen explanation of how the new or amended claims w						
The status of the claim(s) is (or will be) as follows:						
Claim(s) allowed:						
Claim(s) objected to:						
Claim(s) rejected: <u>1-15</u> .	Claim(s) rejected: <u>1-15</u> .					
Claim(s) withdrawn from consideration:

0. Other: see attachment toadvisory action						

Attachment to Advisory Action

This attachment to an advisory action follows an after-final response filed on May 6,

2003. Entry of amended claims 1, 10, 11, 14, and 15 was solicited. Claim 6 was canceled. The

amendment fails to place the application in condition for allowance for the reasons furnished

below. Therefore, the amendment will not be entered at this time.

1. The Applicants traverse the rejection of claims 1-15 under 35 U.S.C. 103(a) as being

unpatentable over U.S. Patent No. 4,551,501 to Shiga et al. in view of Watanabe et al.

The Applicants contend that the nucleating agent in both references is incorporated to the

base polymer by simple blending. This is in contrast with the present claims in which the

propylene polymer is "polymerized in the presence of a catalyst modified with a polymer

containing vinyl compound units."

The compositions of Watanabe et al., indeed, contain a based polymer in which a

compound containing vinyl compound units is incorporated into the polymer additive by simple

blending, much like conventional nucleating agents. However, Shiga et al. teach a different

process. As indicated in the previous office action, a Ti/Et₃Al catalyst is treated with vinyl

cyclohexane for 15 minutes, during which time, polymerization of the monomer occurs. This

results in the formation of poly(vinyl cyclohexane) containing the active catalyst (see Example

1). As such, propylene in Shiga et al. is polymerized in the presence of a catalyst modified with

a polymer containing vinyl units, as presently claimed.

Art Unit: 1713

The Applicants further indicate that Watanabe *et al.* state that coloring agents in amounts greater than 1 wt % impair the polymer properties. By doing so, the reference allegedly teaches away from the instant invention in which higher amounts of pigments, *i.e.*, up to 5 wt % is used. A declaration submitted under 37 C.F.R. 1.132 illustrates use of up to 5 wt % pigment without impairing polymer properties.

While the experiments furnished by the Applicants are thorough and illustrate their invention adequately, they do not detract from the fact that the range of 0.01-1.0 wt %, described in Watanabe *et al.* lies squarely within the range set forth in the present claims. Claims to a range of 0.01-5 wt % are not restricted to an upper range of 1-5 wt % nor do they exclude a lower range of 0.01-1 wt %.

Shiga *et al.* teaches a process for producing nucleated polypropylene which is essentially the same as that described presently. And although the inventors contemplate use of pigment, the amount is not disclosed. It is maintained that the skilled artisan, upon reading both references, would find it obvious to use the amount of pigment disclosed in Watanabe *et al.* in the compositions of Shiga *et al.*, and that one would find it obvious to combine references because both relate to colored, nucleated polypropylene compositions.

In view of the discussion above, the rejection of record has not been withdrawn.

Application/Control Number: 09/530,803

Art Unit: 1713

2. The rejection under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No.

Page 4

5,684,099 to Watanabe et al. applies only to claims 1-5 and 7-15. As elucidated by Applicants in

the after-final response, the subject matter of claim 6 is not taught by the prior art. Thus, the

rejection of claim 6 using this reference no longer applies.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Rip A. Lee whose telephone number is (703)306-0094. The

examiner can be reached on Monday through Friday from 9:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, David Wu, can be reached at (703)308-2450. The fax phone number for the

organization where this application or proceeding is assigned is (703)746-7064. Any inquiry of

a general nature or relating to the status of this application or proceeding should be directed to

the receptionist whose telephone number is (703)308-0661.
